

Orcus Monsters

A retroclone of 4th Edition

Version 0.3 (Alpha)

Dedicated to the hobbyists, designers, developers and publishers that have released their work under the Open Game License.

Orcus is a work in progress. All feedback is welcome.

Monster Statistics

A monster has a rank, a role, a source, a type, tags and a level. For example, a giant frog might be a Standard Lurker (rank and role), Natural Beast (source and type), with the Aquatic tag, and be level 4.

Rank

Standard

Standard monsters are the default, so this is usually left out of the description (a "Standard Assassin" is just described as an "Assassin").

Mooks

Mooks are weaker monsters that can be cut down in large numbers in a single turn. Four mooks are worth one standard monster.

- 1 HP only. A mook takes no damage from attacks that miss them.
- x1/4 XP

Mooks usually do not have a role specified, because mooks - by virtue of their low health and large numbers - usually fulfill their own role.

Elites

Elites are stronger monsters. Two standard monsters are worth one elite.

- x2 HP
- +2 bonus on saving throws
- 1 Action Point per encounter
- x2 XP

Bosses

Bosses are very strong monsters. Five standard monsters are worth one boss.

- x4 HP
- +5 bonus on saving throws
- 2 Action Points per encounter
- x5 XP

Role

Assassin

Do devastating attacks every so often, interspersed with hiding or escaping.

Striker

Take advantage of mobility to make attacks and avoid being tied down in combat.

Archers

Make powerful Ranged or Far attacks, or both.

Blockers

Protect their allies.

Leaders

Help other monster allies fight better. "Leader" is a bonus added to other roles, like Blocker (Leader) or Spoiler (Leader), rather than a pure role.

Spoilers

Mess the PCs up with attacks that inflict harmful effects instead of or in addition to hit point damage.

Wreckers

Bring the pain.

Source

A monster's source describes where its species or type has come from. Certain spells, magic items, class features, and other effects in the game interact in special ways with creatures of a particular source.

Cosmic creatures are utterly alien, aberrant beings. Many of them have innate magical abilities drawn from the creature's alien mind rather than the mystical forces of the world.

Elemental creatures are native to the elemental planes. Some creatures of this type are little more than animate masses of their respective elements. Others have biological forms infused with elemental energy.

Fey creatures are closely tied to the forces of nature. They dwell in twilight groves and misty forests. In some worlds, they are closely tied to the Plane of Faerie.

Shadow creatures are tied to the Plane of Shadow.

Natural creatures are native to the Prime Material Plane, i.e. the world.

Outsider creatures are at least partially composed of the essence (but not necessarily the material) of some Outer Plane. Some creatures start out as some other source and become outsiders when they attain a higher (or lower) state of spiritual existence.

Type

A monster's type speaks to its fundamental nature. Certain spells, magic items, class features, and other effects in the game interact in special ways with creatures of a particular type.

The game includes the following monster types, which have no rules of their own.

Beasts are nonhumanoid creatures that are a natural part of the fantasy ecology. Some of them have magical powers, but most are unintelligent and lack any society or language. Beasts include all varieties of ordinary animals, dinosaurs, and giant versions of animals, as well as fantastical animals like winged cats or elf hounds.

Automatons do not have organs or coherent bodily systems. They may be very simple creatures, like a gelatinous cube, or masses of a material that is magically animated, like a fire elemental or bronze golem. Undead that have been reanimated from a body or body parts, like skeletons and zombies, are automatons, whereas undead that have been transformed from their living form, like vampires, or undead that are a separate soul, like specters, are humanoids.

Humanoids have bipedal forms, and typically are sapient and sentient, and capable of language and culture. Humanoid races include those commonly found as player characters - humans, dwarves, elves, halflings, goblinoids (goblins, hobgoblins, and bugbears), orcs, gnolls, lizardfolk, and kobolds - as well as fey like nymphs and dryads and outsiders with humanoid forms like many devils.

Monstrosities are monsters in the strictest sense - frightening creatures that are not ordinary, not truly natural, and almost never benign. Some are the results of magical experimentation gone awry (such as owlbears), and others are the product of terrible curses (including minotaurs and medusae). Others are creatures with elemental or other magical influences, like dragons.

Tags

A monster might have one or more tags appended to its type. For example, a couatl is listed as Monstrosity, Dragon, Celestial. The tags provide additional categorization for certain creatures. The tags have no rules of their own, but something in the game, such as a magic item, might refer to them. For instance, a spear that is especially effective at fighting demons would work against any monster that has the demon tag.

The most common tags follow, in some cases with some descriptive text.

1. **Dragons** are large reptilian creatures of ancient origin and tremendous power. True dragons, including the good metallic dragons and the evil chromatic dragons, are highly intelligent and have innate magic. Also in this category are creatures distantly related to true dragons, but less powerful, less intelligent, and less magical, such as wyverns and pseudodragons.
2. **Undead** are once-living creatures brought to a horrifying state of undeath through the practice of necromantic magic or some unholy curse. Undead include walking corpses, such as vampires and zombies, as well as bodiless spirits, such as ghosts and specters.
3. **Constructs** are made, not born. Some are programmed by their creators to follow a simple set of instructions, while others are imbued with sentience and capable of independent

thought. Golems are the iconic automatons.

4. **Giants** tower over humans and their kind. They are humanlike in shape, though some have multiple heads (ettins) or strange forms (fomorians). The six varieties of true giant are hill giants, stone giants, frost giants, fire giants, cloud giants, and storm giants. Besides these, creatures such as ogres and trolls are giants.
5. **Earth** creatures are particularly linked to the element of earth.
6. **Fire** creatures are particularly linked to the element of fire.
7. **Water** creatures are particularly linked to the element of water.
8. **Air** creatures are particularly linked to the element of air.
9. **Celestials** are creatures native to the Upper Planes. Many of them are the servants of deities, employed as messengers or agents in the mortal realm and throughout the planes. A celestial who strays from a good alignment is a horrifying rarity. Celestials include angels and pegasi.
10. **Aquatic** creatures are comfortable underwater.
11. **Cold** creatures are particularly linked to cold energy.
12. **Demons** are chaotic evil creatures of wickedness that are native to the Lower Planes. Along with demons, they are classified as fiends. A few are the servants of deities, but many more labor under the leadership of demon princes. Evil priests and mages sometimes summon fiends to the material world to do their bidding.
13. **Devils** are evil creatures of wickedness that are native to the Lower Planes. Along with demons, they are classified as fiends. A few are the servants of deities, but many more labor under the leadership of archdevils. Evil priests and mages sometimes summon fiends to the material world to do their bidding.
14. **Plants** in this context are vegetable creatures, not ordinary flora. Most of them are ambulatory, and some are carnivorous. The quintessential plants are the shambling mound and the treant. Fungal creatures such as the gas spore also fall into this category.
15. **Reptiles** are scaled, cold-blooded creatures.
16. **Shapechangers** have the innate ability to change forms.
17. **Spiders** are eight-legged arachnids.
18. **Swarms** are groups of creatures that act as one, like a swarm of rats or spiders.
19. **Oozes** are gelatinous creatures that rarely have a fixed shape. They are mostly subterranean, dwelling in caves and dungeons and feeding on refuse, carrion, or creatures unlucky enough to get in their way. Black puddings and gelatinous cubes are among the most recognizable oozes.
20. **Mounts** give their riders special benefits.

Alignment

A monster's alignment provides a clue to its disposition and how it behaves in a roleplaying or combat situation. For example, a chaotic evil monster might be difficult to reason with and might attack characters on sight, whereas an unaligned monster might be willing to negotiate.

The alignment specified in a monster's stat block is the default. Feel free to depart from it and change a monster's alignment to suit the needs of your campaign.

Some creatures can have **any alignment**. In other words, you choose the monster's alignment.

Hit Points

A monster usually dies or is destroyed when it drops to 0 hit points.

Speed

A monster's speed tells you how far it can move with a Walk action. It can also take other actions that use speed, like Run and Charge.

Some creatures have one or more of the following additional movement modes.

Burrow

A monster that has a burrowing speed can use that speed to move through sand, earth, mud, or ice. A monster can't burrow through solid rock unless it has a special trait that allows it to do so.

Climb

A monster that has a climbing speed can use all or part of its movement to move on vertical surfaces. The monster doesn't need to spend extra movement to climb.

Wall-climber means that the monster does not have to make Athletics checks to climb, even while climbing upside down.

Fly

A monster that has a flying speed can use all or part of its movement to fly.

If a monster is flying, it typically has to move at least 2 squares per round, or it crashes to earth. It cannot shift or make opportunity attacks while flying.

Some monsters have the ability to **hover**, which makes them hard to knock out of the air. Such a monster stops hovering when it dies. A hovering monster does not have to move at least 2 squares per round, can shift and can make opportunity attacks.

Some monsters will specify how high they can fly ("maximum altitude"), in squares. If they fly beyond that height, they crash.

If a creature has the **clumsy on ground** trait, they suffer a -4 penalty to attack rolls and defences while on the ground. If a creature has the **clumsy in air** trait, they suffer a -4 penalty to attack rolls and defences while flying.

Swim

A monster that has a swim speed doesn't need to spend extra movement to swim.

Phasing

A monster with phasing can move through difficult terrain, obstacles (like walls) and creatures (including enemies) without penalty.

Terrain Stride

Terrain Stride describes a set of traits, each of which allows the monster to ignore difficult terrain in some conditions:

- Ice Stride: Ice, snow or slurry.
- Swamp Stride: Mud, swamp or shallows.
- Stone Stride: Broken ground, uneven stone or rubble.
- Woodland Stride: Shrubbery, trees or plants.
- Web Stride: Webs, like those from a spider.

Ability Scores

Every monster has six ability scores (Strength, Constitution, Dexterity, Intelligence, Wisdom, and Charisma) and corresponding modifiers.

Skills

The Skills entry is reserved for monsters that are trained in one or more skills. For example, a monster that is very perceptive and stealthy might have bonuses to Perception and Stealth checks.

A skill bonus is the sum of a monster's relevant ability modifier and half its level. Other modifiers might apply. For instance, a monster might have a larger-than-expected bonus to account for its heightened expertise.

Vulnerabilities, Resistances, and Immunities

Some creatures have vulnerability, resistance, or immunity to certain types of damage. In addition, some creatures are immune to certain conditions.

Two special resistances are described below:

Incorporeal: A creature that is incorporeal takes half damage on all attacks.

Reactive Resistance X (immediate (counter) action, encounter): The first time a creature is damaged by an attack that does acid, cold, lightning, fire or thunder damage, the creature gains resistance to that energy X. This lasts until the end of the encounter.

Senses

The Senses entry notes a monster's passive Perception score, as well as any special senses the monster might have. Special senses are described in the main Rulebook.

Languages

The languages that a monster can speak are listed in alphabetical order. Sometimes a monster can understand a language but can't speak it, and this is noted in its entry. A "-" indicates that a creature neither speaks nor understands any language.

Telepathy

Telepathy is a magical ability that allows a monster to communicate mentally with another creature within a specified range. The contacted creature doesn't need to share a language with the monster to communicate in this way with it, but it must be able to understand at least one language. A creature without telepathy can receive and respond to telepathic messages but can't initiate or terminate a telepathic conversation.

A telepathic monster doesn't need to see a contacted creature and can end the telepathic contact at any time. The contact is broken as soon as the two creatures are no longer within range of each other or if the telepathic monster contacts a different creature within range. A telepathic monster can initiate or terminate a telepathic conversation without using an action, but while the monster is incapacitated, it can't initiate telepathic contact, and any current contact is terminated.

Level

A monster's **level** tells you how great a threat the monster is. An appropriately equipped and well-rested party of four adventurers should be able to defeat four monsters that each have a level equal to the adventurers' level without suffering any deaths. For example, a party of four 3rd-level characters should find four level 3 monsters to be a worthy challenge, but not a deadly one.

Recoveries

Although they rarely get a chance to use them, all monsters (unless otherwise mentioned) have at least 1 recovery. Level 11+ monsters have 2, and Level 21+ monsters have 3.

Experience Points

The number of experience points (XP) a monster is worth is based on its level. Typically, XP is awarded for defeating the monster, although the GM may also award XP for neutralizing the threat posed by the monster in some other manner.

A monster's XP is also used to calculate how many monsters should be included in an encounter.

Table - Monster XP (Adventurer Tier)

Auras

A creature's aura has effects on creatures within a burst X equal to the aura X listed in the monster description.

Actions

When a monster takes its action, it can choose from the options in the Actions section of its stat block or use one of the actions available to all creatures, such as the Dash or Hide action, as described in the Rulebook.

See the Rulebook for more details of how to interpret powers.

Special symbols are used to indicate whether an attack is a basic attack, and what its range is:

Basic Melee Attack

Melee Attack

Basic Ranged Attack

Ranged Attack

Near Attack

Far Attack

Limited Usage

Some special abilities have restrictions on the number of times they can be used.

Refresh X, Y: The notation "Refresh X, Y" means a monster can use a special ability once and that the ability then has a random chance of refreshing during each subsequent round of combat. At the start of each of the monster's turns, roll a d6. If the roll is one of the numbers in the refresh notation, the monster regains the use of the special ability. The ability also refreshes when the monster finishes a short or long rest.

For example, "Refresh 5, 6" means a monster can use the special ability once. Then, at the start of the monster's turn, it regains the use of that ability if it rolls a 5 or 6 on a d6.

Encounter: This notation means that a monster can use a special ability once and then must finish a short or long rest to use it again.

Equipment

A stat block rarely refers to equipment, other than armor or weapons used by a monster. A creature that customarily wears clothes, such as a humanoid, is assumed to be dressed appropriately.

You can equip monsters with additional gear and trinkets however you like, and you decide how much of a monster's equipment is recoverable after the creature is slain and whether any of that equipment is still usable. A battered suit of armor made for a monster is rarely usable by someone else, for instance.

Monster Templates

Certain creatures are created by adding a template to an existing creature. A templated creature can represent a unique creature, the individual creation of a single experimenter, or the first generation of offspring from parents of different species. Other templates represent a thing that can happen to a creature, like becoming a ghost.

A template usually turns a standard monster into an elite monster. Applying an elite template to a monster that is already an elite turns it into a boss monster.

Standard Bonuses

If you apply a template to a monster, it gets the following standard bonuses depending on whether it ends up as an elite or as a boss:

Elites

From Standard to Elite:

- x2 HP
- +2 bonus on saving throws
- 1 Action Point per encounter
- x2 XP

Bosses

From Standard to Boss:

- x4 HP
- +5 bonus on saving throws
- 2 Action Points per encounter
- x5 XP

From Elite to Boss:

- x2 HP
- +5 bonus on saving throws total (doesn't stack)
- +1 Action Point per encounter
- x2.5 XP

Ghost

Speed: fly 6 (hover).

Incorporeal: Take half damage from all attacks. See *vulnerabilities*.

Vulnerable to: radiant damage 10, force damage 10. If you take radiant or force damage, you lose incorporeal until the start of your next turn.

Drain Lifeforce

While you are adjacent to a creature that is staggered or dying, you gain regeneration 5 (10 at Level 11, 15 at Level 21).

 **Malevolence** (standard, refresh 5, 6) • Psychic

Ranged 5, 1 target; Level +2 vs Will; target is controlled (save ends). You are removed from play until the target succeeds on their save, then you are placed in an unoccupied space adjacent to them. While removed from play, you do not take turns, suffer persistent damage or make saving throws.

Half-Fiend

Defenses: +2 Fortitude, +2 Reflex.

Darkness Aura 6: Bright light within the aura is reduced to dim light.

Senses: Darkvision .

Resistance to: acid 5, cold 5, fire 5.

Level 11: Acid 10, cold 10, fire 10; *Level 21:* Acid 15, cold 15, fire 15.

Immunity to: Poison.

Smite Good: Attacks against Good and Lawful Good aligned creatures do +2 damage (+4 at Level 11, +6 at Level 21)

Blasphemous Word (standard, refresh 5, 6)

Near burst 5, enemies only; Level +2 vs Will; target dazed (save ends) or, if the target is Staggered, stunned (save ends).

Forlorn Shade

Senses: Darkvision

Defenses: +2 AC; +1 Reflex, +1 Will

Shadow Walk (swift, encounter) • Illusion, Teleportation

The shade shifts 3 and is invisible until the end of its next turn.

Dark Challenge

When a shade strikes a target in melee, the target is marked until the end of the shade's next turn.

Adventurer

You can apply a character class to a monster using the simple Adventurer template below.

As with other templates, the move from standard to elite doubles a creature's HP, gives them a saving throw bonus and an additional action point.

Defenses: As per the class.

Trained Skills: Choose two from the class skills.

Class Features: As per the class.

Powers: Choose from those powers available to the class, of the creature's level or lower. Do not choose two powers of the same frequency *and* level (e.g., do not choose two level 13 encounter powers or two level 25 daily powers).

- One at-will power.
- One encounter power (two from level 11).
- One daily power (two from level 21).
- One utility power (two from level 11, three from level 21).

Monsters

Animals

Animals are mundane beasts, like those found in the real world.

Eagle

Initiative: +7

AC: 16; **Fort:** 13, **Ref:** 16, **Will** 13

HP: 36, **Staggered:** 18

Resistance to: Melee and Ranged attacks (half damage), **Vulnerability to:** Near and Far attacks 5

Aura 1: The rattlesnake swarm makes a basic attack as a free action against each enemy that begins its turn in the aura.

Speed 6, climb 6

Plague of Fangs (standard, at-will) • Poison

+7 vs. AC; 1d6+4 damage, and the rattlesnake swarm makes a secondary attack on the same target. *Secondary Attack:* +5 vs. Fort 1d6+1 poison damage, and persistent 2 poison damage.

Sticky-Tongue Toad

Level 2 Wrecker (125 XP)

Medium Natural Beast (Unaligned)

Senses: Perception +6; low-light vision

Skills: Athletics +10 (+15 jumping), Stealth +8

Str 18 (+5), **Con** 16 (+4), **Dex** 15 (+3), **Int** 2 (-3), **Wis** 11 (+1), **Cha** 8 (+0)

Initiative: +3

AC: 14; **Fort:** 16, **Ref:** 14, **Will** 12

HP: 46, **Staggered:** 23

Speed 4, swim 4; see also *leap*

Bite (standard, at-will)

+5 vs. AC; 1d8+4 damage, or 1d8+8 against a grappled target.

Tongue Lash (swift, at-will)

Ranged 3; +3 vs. Reflex; the target is grappled (until escape) and pulled adjacent to the giant frog.

Leap (move, at-will)

The giant frog shifts 4 squares.

Great Ape

Level 3 Wrecker (150 XP)

Large Natural Beast (Unaligned)

Senses: Perception +7; low-light vision

Skills: Athletics

Str 19 (+5), **Con** 14 (+3), **Dex** 15 (+3), **Int** 2 (-3), **Wis** 12 (+2), **Cha** 10 (+1)

Invaders

The Invaders represent an alien invasion. This mixing of genres will not suite all fantasy campaigns, but it has been a part of the hobby since the very beginning. The Invaders may be merely an exploratory force, or a misdirected unit intended for a fight on another planet, or the full force of an interstellar armada. In any case, the creatures outlined here represent bodies (also called "shells") cobbled together by the aliens from supplies on their spaceship and whatever materials - inorganic and otherwise - that they find.

The invasion force consists of "skinner" shock troops and "widows", which provide command and control. Mobile artillery units are called "chanks" and the flying vehicles are "screamers". There are also rarely seen larger "beast" mobile strongpoints.

The Invaders have basic intelligence and, with the help of a widow, can coordinate their actions and formulate tactics. However, their overarching strategy of the entire force depends on the "Tri-Pod"—the alien commander.

Punk

The punk is a larger infantry support unit with four legs, capable of laying down heavy fire against single or multiple targets. What's left of its organic head has been supplanted with considerable tracking equipment to pinpoint distant targets. The punk is also often seen an anti-aircraft weapon. It is often flanked by at least a half-dozen skimmers.

Ranged 15/30; +23 vs. AC; 10 damage.

Backup System (immediate (counter), encounter)

The skinner is reduced to 0 or fewer hit points by a non-critical hit: The skinner regains one hit point. It can stand up on its turn.

Beast

Also known as a conversion unit, the beast is a mobile command node that expands the Invaders' influence and sphere of control. Although capable of combat, the beast prefers to remain back, while constructing more Invaders. While fixed and defended facilities produce larger units like screamers and punks, beasts expand though uncontrolled and populated areas producing ground units as fast as they can acquire raw materials. To destroy one is to cripple the enemy advancement in that area. Unfortunately, beasts are incredibly difficult to defeat. Unlike many Invaders, the beast, although cybernetic, has no visible human features.

Slam (standard, at-will)

+19 vs. AC; 2d8+15 damage.

Raw Materials

Place six corpses within a Near burst 10 around the beast at the start of the encounter. The beast must be in an adjacent square to a body to create a skinner.

Grey Infection (standard, at-will) • Weapon

+16 vs. Reflex; 2d8+7 damage, and the target suffers persistent 1 damage until the end of the encounter.

 **Shoulder-Mounted Plasma Caster** (standard, at-will) • Weapon

Near burst 1 (within 20/40); +16 vs. Reflex (each creature in burst); 2d8+7 damage, and the target suffers persistent 5 fire damage (save ends).

 **Flesh Hooks** (standard, refresh 5, 6)

Ranged 20; +16 vs. Reflex; 3d6+13 damage, the target is pulled into an adjacent square, and the beast immediately makes a *gray infection* attack.

Convert (move, at-will)

Target one adjacent corpse or killed creature. The target is replaced with a skinner. A skinner placed this way acts on the beast's initiative and can act immediately after being placed.

Nano-Propagation (swift, at-will)

Select one enemy suffering from persistent damage from grey infection. Increase the persistent damage by 1.

Chank

This unfortunately nicknamed cybernetic mobile artillery unit is only seen coupled with larger units. It has few organic components in its assembly, mostly consisting of recoil absorption hardware and armament. As the chank has no close combat capacity, it depends on its guards to protect it.

Perimeter Blast (standard and move, refresh 4, 5, 6) • Weapon

Far burst 1 (within 5 and 120); +19 vs. Reflex (each creatures in burst); *Secondary Attack:* The target is pushed 4 squares. If the target cannot be pushed 4 squares, it takes 2d8+8 damage. Buildings, objects, non-moving vehicles, and terrain take 40 points of damage.

Secured Position

As long as there is at least one ally adjacent to the chank, the chank is immune to being immobile, knocked prone, pushed, slowed or marked.

Charge Capacitor (standard, at-will)

Increase the damage of the chank's next *self propelled plasma artillery system* attack by 1d8.

Capacitor Purge (immediate (react), encounter)

The chank is reduced to zero hit points or fewer: The chank makes a *perimeter blast* attack.

Mother Screamer

Screamer is an umbrella term for one-manned aircraft operated by the shells. Both are considered attack vehicles as neither can be used as a transport. The smaller screamer is used in close quarters as a high-ground support platform for ground based infantry shells while the larger one is an anti-vehicle / crowd disposal device. The only organic compound used in the screamer is a brain (the baby often sports an exposed human skull).

Repulsor Shield

The screamer does not provoke opportunity attacks when attacking. The screamer is immune to all hits from attacks made from 30 squares away or more.

Deploy Support Unit (move, at-will)

Place a screamer baby in an adjacent square. The mother can only have three baby units in the encounter at a time. A baby placed this way acts on the mother's initiative and can act immediately after being placed.

Dash

Shift 2 squares.

The Tri-Pod

Spirit, the Invader commander, is locked in a three-legged mobile command robot known inventively as the Tri-Pod.

Heat Ray (standard, at-will) • Weapon

Ranged 50/100 (minimum range 4); +20 vs. AC; 24 damage. This is considered a critical hit. Spirit does not provoke opportunity attacks with its heat ray. Spirit cannot use heat ray on a creature it is grappling.

Force Field

Spirit is immune to all damage until a **single hit** inflicts 50 damage or more.

Dual Turrets (standard, at-will) • Weapon

Spirit makes two *heat ray* attacks. They cannot target the same creature.

Tentacle Whip (move, at-will) • Weapon

Reach 4; +18 vs. Reflex (two creatures); 2d8+8 damage, and the target is either grappled or pushed 6 squares. If the target hits an obstruction, it takes 2d8 additional damage.

Tentacle Crush (move, at-will)

Reach 4; +18 vs. Fortitude (one creature Spirit is grappling); 3d6+13 damage.

Power System's Repaired (immediate (react), encounter)

Spirit is reduced to 0 hit points or lower: Spirit's force field is re-activated; it stands up (if prone) and regains 300 hit points.

Widow

The widow is an advanced skinner that has the capacity to influence if not outright control the skimmers around it. The widow has very few organic components, sometimes as little as 2%. It also doesn't always completely follow the humanoid form. Some have synthetic tentacles while others have multiple legs. Individual units have been nicknamed "scorpion," "centaur," "tarantula," and "octopus".

Dash (move, at-will)

Shift 2 squares.

Pulse Engine (immediate (counter), encounter)

An enemy hits the screamer: The screamer shifts one square, and the attack misses.

Juggernauts

Juggernauts are the golem-like constructs created by a long-ago empire. Each juggernaut has room in its torso for a humanoid rider, who can direct the juggernaut.

The Minotaur

The original use of the Minotaur was to breach walls and other defenses during siege warfare.

Lightning Shot (standard, at-will) • Lightning

Ranged 30/60; +10 vs. AC; 2d8+6 damage.

Minotaur Rush

The minotaur is immune to opportunity attacks. When the minotaur moves, it ignores difficult terrain and squares occupied by enemies. Shunt enemies in squares the minotaur enters 1 square. The minotaur cannot be knocked prone.

Iron Onslaught (standard, refresh 6)

The minotaur shifts up to 9 squares in a straight line. The minotaur makes a *slam* attack against each enemy in reach during this movement. On a hit, the target is knocked prone. The minotaur can only attack each target once.

Eruption (immediate (react), encounter)

The minotaur is staggered: The minotaur immediately stands up if prone and recovers from all conditions it suffers from. The minotaur makes an *iron onslaught* attack.

The Emperor

The Emperor is built in the shape of a gigantic, powerful human. The exposed copper and bronze wires that make up its artificial musculature give it the appearance of a skinless, gleaming gold giant floating through the air.

Appendix: Creating New Monsters

This guide will step you through the process of creating a new monster.

Level and Rank

At what level do you expect heroes to fight this monster? That is the monster's level.

If a monster has a resistance or vulnerability "X" listed, this is equal to 5 for monsters level 1-10, 10 for monsters level 11-20 and 15 for monsters level 21-30.

When the heroes fight the monster, do you expect it to challenge four or five heroes (Boss rank), two or three heroes (Elite rank), one hero (Standard rank) or only to challenge one hero when there are about four of the monster (Mook rank)?

Size, Source, Type and Tags

This is a naturalistic description of how large the monster is, which plane of existence it comes from, what form its body takes and any additional categories it falls into.

Sizes

- Tiny: Cat sized or smaller
- Small: Dog sized
- Medium: Human sized
- Large: Cow sized
- Huge: Elephant sized
- Gargantuan: Blue whale sized or larger

Sources

- Alien to this universe: Cosmic. Resistance to radiant X, vulnerable to psychic X.
- Native to elemental planes: Elemental
- Native to outer planes: Outsider. Resistance to radiant X, vulnerable to necrotic X.
- Native to the Plane of Faerie: Fey. Vulnerability to poison X.
- Native to the Plane of Shadow: Shadow. Resistance to necrotic X, vulnerable to radiant X.
- Native to the world: Natural

Type

- Humanoid body and physiology: Humanoid
- Animal body and physiology: Beast
- Unnatural body and physiology: Monstrosity
- Assembled from raw matter or materials: Automaton

Senses

- The monster is blind: Blind tag, resistance to radiant X.
- The monster can see in the dark: Darkvision.
- The monster can see well in poor lighting: Low-light vision.
- The monster can accurately sense the presence of creatures without seeing, e.g. through echolocation: Blindsight 10.
- The monster can accurately sense the presence of creatures in contact with the ground, e.g. through vibrations: Tremorsense 10.
- The monster can see through shapechanging magic, illusions, invisibility, etc.: Truesight 10.

Movement

Most monsters have a regular speed, which is their speed on land (walking). A monster that is as fast as a human should have a speed of 6.

Some monsters can also swim, climb, fly, burrow or teleport.

There are a number of special movement properties:

- The monster can move unimpeded through certain difficult terrain: Terrain Stride.
- The monster's feet are grippy, allowing it to travel across sheer surfaces and upside down across ceilings: Wall-Walker.
- The monster can move through obstacles as if they weren't there: Phasing.
- The monster is a good flier or swimmer but clumsy on the ground: Clumsy on Ground -4.
- The monster is a poor flier but comfortable on the ground: Clumsy in Air -4.
- The monster is a poor swimmer but comfortable on the ground: Clumsy in Water -4.
- The monster can stay in place while flying, even while knocked unconscious: Hover.
- The monster can fly or levitate, but not above 10 feet: Maximum Altitude 2.

Powers

The best way to determine good powers for a monster is to look at similar, existing monsters. However, here is some guidance about the kind of damage that powers should do, by level.

For each power you design, identify whether it has a single target or two or more targets, and whether it is usable at-will or less frequently (for the purpose of this table, powers usable once per encounter and usable on a refresh are counted together as "surge" powers). This determines how much damage it should do, by level.

Mooks deal static damage, and in general should only target one creature with each attack.

Creatures with the wrecker role do bonus damage on all attacks. Mooks with the wrecker role should only add half that number to their damage.

Table - Monster Level and Damage (Adventurer Tier)

Abilities

Distribute the following ability scores so that each pair of Strength and Constitution, Dexterity and Intelligence, and Wisdom and Charisma gets one:

- 16 + half level
- 13 + half level
- 13 + half level

Then choose any number lower than 13 + half level for the remaining three ability scores. For example, animals are usually given an Intelligence of 1 or 2.
